

## Press Release

InfraTec GmbH

Dresden, 19/02/2013

### „Die Maus“ (The Mouse) uses VarioCAM® high resolution for Thermal Imaging

Measurements of heat developments on light bulbs, energy-saving bulbs and LEDs

The successful children's program „Die Sendung mit der Maus“ (The Program with the Mouse) tells about current everyday life topics in its popular knowledge films. The latest episode features InfraTec's VarioCAM® high resolution as a non-contacting temperature measurement device. The purpose of the test, in which the infrared camera was used, was to compare the exact temperature developments of regular light bulbs, energy-saving bulbs and LEDs.
